I am a recent college graduate from Boston University with a B.A. in Economics and am a full-stack web developer trained by the Columbia Engineering Coding Boot Camp

Projects

CarEz | Columbia Engineering Coding Boot Camp

Lead UX Engineer

- This project was a full stack application establishing a forum for users to create and view posts about cars
- This project was done using HTML, CSS, JavaScript, Node.Js, Express.Js, MySQL, Github, Heroku, Handlebars and several other packages to create a server and dynamic database to store user inputs and logins and to display user posts on a personal dashboard and public homepage.

The Oracle Project | Columbia Engineering Coding Boot Camp

UX Engineer

- This project developed a daily horoscope and random fact generator
- This project was accomplished by using HTML, CSS, and JavaScript, along with using browser-based technologies like JQuery and Bootstrap to work with public APIs to generate horoscope data and random facts data from two APIs. As UX Engineer, I was in charge of ensuring functionality of data fetch functions and managing return functions to generate data for users.

Craft | Columbia Engineering Coding Boot Camp

UX Engineer

- The purpose of this project was to create a fully functional online store
- This project was accomplished using Node.Js, Express.Js, React.Js, and MongoDB as our database along with several other technologies such as Stripe, CryptoJS, Axios, and Redux to create an online store with a unique and secure user experience. As UX Engineer, I created and managed our database, wrote API calls, and assisted in setting up secure login functionality.
